<u>S. NO.</u>	<u>EXPERIMENT</u>	<u>DATE OF EXP.</u>	<u>SIGNATURE</u>
1.	WAP to implement all major functions of string.h using switch case to select a specific function by user's choice	20/04/2021	
2.	WAP to reverse a linked list using iterative and recursive method	23/04/2021	
3.	WAP to implement iterative Tower of Hanoi	17/05/2021	
4.	WAP to count the number of objects of a class using static member function	19/05/2021	
5.	WAP to declare a class Time, define a para. constructor, add two Time objects using member function and assign to third object. Implement all possible cases of time	21/05/2021	
6.	WAP to define a class Complex, overload '+' to add two numbers using member function and overload '*' to multiply two numbers using friend function of the class	24/05/2021	
7.	Implement simple Multithreaded Server to perform all Mathematics Operations Parallel in Java	31/05/2021	
8.	WAP to prepare a list of 50 Questions and their Answers using File Handling	07/06/2021	
9.	WAP to display 10 random Questions out of 50 Questions in experiment 8 (do not display their answers)	09/06/2021	
10.	WAP to implement Producer-Consumer problem using Threads	11/06/2021
